

Rebalance Your Beauty

OXFOLIATION™

BENEFIT: EXFOLIATION + OXYGENATION

Patented technology that gently exfoliates while creating a bubbly, CO₂-rich environment on the skin's surface. The body responds by sending increased levels of oxygen to the skin, creating ideal conditions to nourish and transform the skin from the inside out.

LUX

BENEFIT: NOURISHMENT

Ultrasound waves create micro-vibrations that instantly smooth the skin and increase the permeability of the skin's protective layer, enabling better nutrient absorption.

DETOX

BENEFIT: LYMPHATIC DRAINAGE

A relaxing hands-free massage promotes lymphatic draining, delivering instant reduction of redness and puffiness.
